DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5-18 and 20-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. Independent claims 5 and 9 require that the chamber has an outer shape of approximately a cuboid. Although page 7, lines 7-12 of the specification does state that the process chamber has approximately the shape of a cuboid, the cuboid shape is disclosed to be advantageous because it facilitates vortex mixing. Accordingly, the specification provides support for the process chamber having the inner shape of a cuboid, but does not lend support for the process chamber having the outer shape of a cuboid. Page 7 of the specification speaks of one embodiment in which the process chamber has a tubular inner shape. Immediately following this disclosure, Applicant states that, alternatively, the process chamber can have the shape of a cuboid. The clear implication is that the inner shape of the process chamber can have either a tubular shape or a cuboid shape. There is no written description of a single embodiment in which the inner shape is that of a tube and the outer shape is that of a cuboid.

Applicant additionally points to Figures 3, 9 and 16 to give support for the amendment. However, these drawings only disclose the use of a cuboid flange attached to the top of a tubular container. The outer shape of the tubular container is not cuboid. Only the upper flange portion is cuboid. This limited disclosure does not support claim limitations suggesting that the entire process chamber has a cuboid outer shape.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
